Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Jeong (US 5,204,583).

Regarding claims 1-3, Jeong discloses (see figures 1 and 3) a fluorescent display device including a vacuum envelope, cathode filaments (12), cathode supports (21), and anodes (8) further including fluorescent material. Jeong continues to disclose (see figure 1) the cathode supports including a base (20) and an anchor where the anchor includes an arm portion (22), and tab portion (25). The arm portion includes a distal end connected to the tab portion and a proximal end connected to the base portion. Further, Jeong discloses a support member, of identical composition to the anchors, located at the end of the support plate. Each anchor and support member is separated by a slit between arm portions (22).

Regarding claim 2, the Examiner notes that the claim limitation that “the cathode supports is formed by bending a shaped sheet” is drawn to a process of manufacturing which is incidental to the claimed apparatus. It is well established that a claimed apparatus cannot be distinguished over the prior art by a process limitation. Consequently, absent a showing of an unobvious difference between the claimed product and the prior art, the subject product-by-process claim limitation is not afforded patentable weight (see MPEP 2113).

Art Unit: 2879

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jeong (US 5,424,607) discloses the use of resilient support members for a vacuum fluorescent display.

Hamada (US 5,625,254) discloses the use of resilient support members for a vacuum fluorescent display.
